RAWS

INCIDENT OBJECTIVES

Soberanes

1. Incident Name

09/15/2016

2. Date

3. Time **2200**

4. Operational Period

DAY / NIGHT September 16-17, 2016

0700 - 0700 Hours

5. General Control Objectives for the Incident (include alternatives)

Management Objectives

- Provide for the safety of all responders and the public by utilizing national Risk Management Standards and the implementation of appropriate mitigations.
- Reduce firefighter exposure by only engaging fire assignments with the highest probability of success.
- Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and economic interests.
- Utilize local resource specialists to identify and protect sensitive sites and cultural resource values by minimizing impacts from suppression operations.
- Maintain and enhance community, County, State, National Forest and stakeholder relationships through accurate and timely dissemination of information.
- Assess and implement suppression repair needs, where appropriate in coordination with the Resource Advisor following agency policy.
- Manage incident costs effectively for the values at risk through regular and ongoing cost analysis.

Control Objectives

Keep Fire

- East of the Coast Ridge Road.
- North of Nacimiento-Fergusson Road.
- West of Carmel Valley and Reliz Canyon.
- South of current containment lines in Branches I, II and IX.

6. Weather Forecast for Operational Period

- A warming trend with lower humidity into the weekend as high pressure builds over the region.
- Poor humidity recovery expected at night.

7. General Safety Message

- Maintain focus on the task at hand.
- Give clear briefings, and conduct daily after action reviews to continually improve your situational awareness.

Soberanes Fire Weather Forecast **East Operational Area**

Forecast Info

FORECAST NO: 55 NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Thu. - 0700 Fri. UNIT: CA-BEU/LPF MRD

SHIFT DATE: Friday Sept 16th, 2016 **SIGNED:** Jon Bonk / Phil Manuel

Incident Meteorologists

Jon's Cell (Hunter-Liggett): (240)778-5287

FORECAST ISSUED: 2000 hrs. 9/15/16 Phil's Cell (Toro): (240) 499-6636

** Hot and Very Dry; Poor Ridge Humidity Recovery the Next Few Nights **

WEATHER DISCUSSION: High pressure strengthens over the region and will bring a strong subsidence inversion during the overnight hours. Main impacts will be poor overnight humidity recovery. Ridge winds will largely come from the north to northeast and will still pick up short periodic northwest winds as afternoon lower elevation sea breeze winds develop. Heads up for wind alignment on northeast aligned valleys.

WEATHER FORECAST For Today:

WEATHER: Sunny.

TIME AND DATE

TEMPERATURES: Highs 78-86 in the active fire area. (5-7 degrees warmer)

HUMIDITY: 12-17%. (down about 7%)

20 FT WINDS:

RIDGETOP / UPPER SLOPE - Northeast 10-12 mph with gusts 18-22 mph.

LOWER SLOPE / VALLEY - Upslope/upvalley 4-8 mph. Gusts to 15 mph in the afternoon. Except

northeast 8-12 mph with gusts to 25 mph along NE/SW aligned drainages.

Marine Layer: Less than 1000 feet...little impact. Haines: 4

WEATHER FORECAST For Tonight:

WEATHER: Clear.

TEMPERATURES: Lows 48-53 in the valleys. Ridges 68-72 through the night. (4-7 degrees warmer).

HUMIDITY: Valley bottoms: Max 55-60%. Ridges/Thermal belt: Peaking 32-37% mid-evening then falling to

22-28% around 2300.

20 FT WINDS:

RIDGETOP – North to northeast 6-10 mph with gusts 12-15 mph easing to 4-8 mph overnight.

SLOPE/VALLEY – Down canyon 3-6 mph.

Marine Layer: Less than 1000 feet...little impact. Thermal Belt: Around 3500 feet

EXTENDED FORECAST: Increasing temperatures through Monday with humidity falling to single digits both daytime mid and lower slopes plus on the ridges overnight. Slope/Valley winds will be mainly terrain driven. Ridgetop winds will be primarily out of the North/Northeast through Sunday with brief wind shifts from the west at times due to battling onshore winds from the coast. On Monday evening, ridge winds may shift then coming from the southwest and remain less than 10 mph.

INPUTS

WEATHER (see attached forecast)

*** Wind Summary ***

DAY: RIDGETOP: 0600 NE 10-12mph G22 SLOPE/VALLEY: 0600-0900 Down-valley 2-5mph......

0900-1900 Upslope/Up-valley 4-8mph G12-15

NIGHT: RIDGETOP: 1800 NE 6-10mph G12-15 SLOPE/VALLEY: 1900-0600 Down-canyon 3-6mph

OUTPUTS

FIRE BEHAVIOR

GENERAL

LOCAL THRESHOLDS - WATCH OUTS

Combinations of any of these threshold factors can greatly increase fire behavior:

Thresholds:		20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%
Egrapated	Ridges	10-12mph	17-20%	78°	4-7%
Forecasted	Valleys	4-8mph	12-17%	86°	4-5%

Coastal Sage Scrub fuel, primarily chamise and button brush, have seasonally low live fuel moisture for this time of year. Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant.

Probability of ignition: Day: Shaded 60-70% Unshaded 80-90%

Night: 50-60%

SPECIFIC

BRANCH III, IV, VI

Today will be much like yesterday for fire behavior. Conditions will be a bit warmer and drier and the fuels will respond accordingly. The general winds will remain out of the northeast with the occasional shift to the north. Due to stronger daytime heating, the upslope winds will be higher today than yesterday. Based on yesterday's firing operations, expect fire spread to cease above 35% Rh. Optimal conditions for burning will be 1000 to 1800.

Fire behavior will stabilize and diminish around 1900 as the humidity increases. This will be brief and humidity will begin falling below 35% by 2200. Fire activity will increase in and above the thermal belt (3500ft) which equates to favorable conditions for firing operations.

AIR OPERATIONS

A shallow inversion may occur but should have little effect on air operations. VFR conditions expected through the remainder of the days operational period.

SAFETY

Watch Out Situation 14 is emphasized today: **Weather becoming hotter and drier.** High pressure means continued warmer and drier conditions for the next several days. Expect fire behavior to increase.

Soberanes Fire Weather Forecast West Operational Area

Forecast Info

NAME OF FIRE: Soberanes FORECAST NO: 55

PREDICTION FOR: 0700 Fri - 0700 Sat UNIT: CA-BEU/LPF MRD

SHIFT DATE: Friday Sept 16th, 2016 **SIGNED:** Jason Clapp

TIME AND DATE **Incident Meteorologist**

FORECAST ISSUED: 1930 9/15/16 Jason Clapp - Cell 530-383-4839 (West-Molera)

WEATHER DISCUSSION: ** Continued Warming and Drying **

Upper ridge building over area will allow marine layer to re-establish near the coast around 1000 ft, but should not impact the coast. Expect northeasterly winds again continuing into mid-morning, giving way to breezy westerly winds in the afternoon along coastal ridge. Transport winds still from NE, so East Ops smoke will move over West Ops Area. Upper ridge will continue to warm and dry through the weekend.

WEATHER FORECAST For Today:

WEATHER: Shallow marine layer to about 1000ft this morning, staying west of coast. Northeast to East winds overnight into this morning will help dry airmass over burn area by sunrise. Battling winds on Coast Ridge and leeside into Higgins drainage between coastal westerly winds and Higgins upcanyon winds.

TEMPERATURES: Highs 78-81 active fire area. (Up 3-5 degrees)

HUMIDITY: 20-25% (Down 3-5%). Lowest late morning/early afternoon.

20 FT WINDS:

RIDGETOP - NE/E 10-12, gusting 15-18 mph, weakening late morning...after 1200 shift SW-W 6-10 mph, gusting 15 mph on coastal ridge.

DIV PP may shift E-S in afternoon as coastal winds battle interior NE winds.

SLOPE/VALLEY – Downvalley 2-5 mph through 0900, then upvalley/upslope 3-7 mph.

Gusts 9-12 mph in the afternoon.

Marine Layer Top: 1000 feet Above Sea Level. Haines: 4

WEATHER FORECAST For Tonight:

WEATHER: Clear as marine stratus should stay just offshore. Remaining breezy along ridges.

TEMPERATURES: Lows 58-62 in the valleys. 62-66 ridges. (Up 4-6 degrees).

HUMIDITY: Lowering overnight 35-45% in Higgins drainage...30% dipping to 20% toward Saturday morning over ridges w/ NE winds.

20 FT WINDS:

RIDGETOP – Becoming Northeast/East 5-9 mph after 1800. Gusts 12-16 mph toward midnight. **SLOPE/VALLEY –** Downcanyon 3-6 mph.

Marine Layer: 1000 feet remaining west of Highway 1.

EXTENDED FORECAST: A warming trend through the weekend and into Monday with marine layer near 1000-1500 ft. Highs 84-89 into Monday with the weekend being the warmest and driest (18-24%). Nighttime and morning NE winds dominate with SW afternoon winds over coast ridge. Sunday night may be last night for NE ridge winds...Mon and Monday night may keep weak westerly winds due to approaching trough.

INPUTS

WEATHER SUMMARY: (See Weather Forecast)

Wind Summary

Day- Ridge Top: Morning NE/E 10-12 mph, Gusting 15-18 mph. After 1200 shifting SW/W 6-10 mph, gusting 15 mph on coastal ridge.

Slope/Valley: Down valley 2-5 mph through 0900 then up valley/upslope 3-7 mph gusting 9-12 mph afternoon.

Night- Ridge Top: Becoming NE/E 5-9 mph after 1800. Gusting 12-16 mph toward midnight.

Slope/Valley: Down Canyon 3-6 mph

Haines Index: 4 Low

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Local Thresholds- Watch Outs

Combinations of any of these threshold factors may greatly increase fire behavior.

Thresholds:		20' wind	RH Less	Temperatures	10hr fuel
		Over 7mph	Than 17%	Over 98°	Less than 6%
Foreset	Ridges	6-10mph	20-25%	78-81°	4-6%
Forecast	Valleys	3-7mph	15-20%	80-86°	2-5%

Coastal Sage shrub fuel moisture, primarily chamise and button brush are running below seasonal averages.

Standing and down dead fuels remain from the 1999 Kirk and 2008 Basin fires. These heavy fuels can hold heat for days and under the right conditions initiate fire spread.

Probability of Ignition: Day: 60-70%, Night: 40-50%

NFDRS Indices: Projected Hastings ERC 66, Arroyo Seco BI 58

SPECIFIC:

Branch VI, VII and VIII: Lingering hotspots may exist in the Arroyo Seco and Higgins Creek area keep some eyes on these areas particularly in the afternoon and evening.

AIR OPERATIONS:

Smoke from burnout operations could limit air operations missions on the interior and west side of the fire.

SAFETY:

As you plan burnout operations remember a safety zone is a "preplanned area of sufficient size and suitable location that is expected to protect fire personnel from known hazards without using fire shelters."

6 Control Operations/Mork Assignments										

· Continue to coordinate contingency planning and implementation with Branch VI.

- East REMS O-10918 and O-10919 assigned to East Operations.
- ARCH Anne Brown and ARCH Emery Manuel assigned to Branches IV and VI.
- Division / Group Supervisor validate apportionment with Mark Courson at (805) 455-5073 between 0830-1100 hours.
- GPS location of all accountable property (pumps, porta-tanks, etc.) and report GPS coordinates to Situation Unit.

Soberanes Fire Safety Message

INCIDENT #CA-BEU-003422 DATE: **09.16-17.16** TIME:**0700 – 0700 Day/Night**

General Safety Concerns:

- Driving: Narrow/dusty roads, others driving faster than we do. HEADS UP!!!
- Risk versus benefit: Don't get caught up in the moment! Always weigh the risks of tactical
 operations against the potential benefit. Especially on steep slopes at night!
- **Drought conditions:** Use all of the assessment tools; Heads up for fire behavior; Ensure **LCES** is in place; Take extra time to ensure it is safe to engage! Use extra caution all the time.
- *All trees can be dangerous*. They don't have to be leaning, dead, burned, or gnarly. Perform adequate assessments, minimize exposure and risk around all trees.
- Indirect Line: Remember there is "Unburned fuel between you and the fire." Make sure all personal know their escape routes and safety zones.

MY SAFETY

An important aspect of safety is individual responsibility for one's own health & safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety.

Make a Safety Difference

- As a supervisor, provide constant and relentless oversight.
- Stay focused on the task at hand, all the time!
- Come up with a safer way to perform a risky assignment.
- Discuss the near miss.
- Never tolerate "Hey, watch this!"
- Discuss the effects of fatigue, and mitigate the effects of fatigue.
- While in the fire zone, wear your hardhat when you leave the vehicle.
- Have a purpose in what you do.
- Don't trust other drivers!

Take Five at Two!

- Around 2:00 in the afternoon is a good time to stop and reassess your situation.
- Take 5 minutes to determine what conditions have changed since you started work
- Are your original objectives still valid considering current weather and fire behavior?
- How should you adjust your tactics to accomplish the original leader's intent for the day?
- Are your objectives still commensurate with values at risk, including the safety of you and the resources you are responsible for?

Prepared by the Team 4
Safety Group.

INCIDENT RISK ANALYSIS SOBERANES FIRE CA-BEU-003422 (ICS 215a) Day/Night Shift

MCIDEN		NES FIRE CA-BEU-003422 (ICS 215a) Day/Night Shift
DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITTOATIONO / WARRINGO / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	 Use caution while driving on all incident roads. Heavy local traffic on Highway 1 & Carmel Valley roads during shift changes. Watch out for wildlife on all roads, especially during dawn and dusk hours. Drive defensively! Expect the unexpected around every curve. Watch for other vehicles, rocks and debris on the roadway. Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers when available. Roads are narrow with steep drop-offs, were not in a hurry. Know that the flagging on the side of Coast Ridge road indicates a false berm created by dozer operations, stay to the inside of the roadway.
ALL	HAND AND AERIAL FIRING OPERATIONS	 Develop a plan and ensure all personnel understand it. Follow the chain of command in implementing the firing operation. Know who you are working for and what your job is. Post lookouts and make sure communications exist. Make sure all personal know their escape routes and safety zones. Ensure accountability for all line personnel. Remember there is "Unburned fuel between you and the fire." Hazards: Heli-torch, drip torch fuel, firing devices and projectiles.
ALL	COMMUNICATIONS	 Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Radio Communications may be poor in some areas. Use human repeaters. Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 3 different groups, ensure you are using the proper one. Don't be afraid to over communicate. Ensure everyone gets a proper and through briefing.
ALL	AVIATION OPERATIONS	 Use risk analysis to determine if any given flight is necessary. Use air to ground tactical freq. when assigned a specific aircraft. Use air to ground command freq. to communicate with air attack. Use concise statements & clock directions when directing aircraft IRPG pg. 57. Maintain good separation between ground forces & water/retardant drops. Review and Follow "Aviation Watch-Out Situations" on page 44, IRPG. Remember visibility changes minute by minute here on the Soberanes Fire.
ALL	FIRE BEHAVIOR AND WEATHER	 The weather is becoming hotter and drier. Beware of increased active fire behavior. Watch out for increasing winds in the afternoon hours. Communicate any observed changes in weather and fire behavior. Maintain adequate escape routes and safety zones. Set trigger points.
ALL	STRUCTURE PROTECTION	 Review Structure Protection; IRPG pages 12-16. Do not commit to stay at a structure unless the area around the structure represents an adequate safety zone. Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. Look for propane tanks and other hazardous materials.
ALL	POSION OAK	 Identify employees who are highly receptive to poison oak and minimize their exposure. Clean clothing that has been exposed to poison oak. Check in with medical for treatment when exposed. Ensure all personnel can identify Poison Oak in work and camp areas.
ALL	ENVIRONMENTAL HAZARDS	 Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. Watch footing and hand placement around rocks. Determine if any personnel under your control are allergic to bee stings.
ALL	FATIGUE & COMPLACENCY	 Be alert for signs of fatigue and take breaks as necessary. Get adequate rest, follow the 2:1 work/rest guidelines. Monitor ALL resources for level of fatigue. Repeated assignments in the same area can lead to complacency, making personnel more vulnerable to accidents. Take steps to maintain situational awareness for the duration of the incident. Maintain good hydration and a healthy food intake.
ALL	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use a spotter when backing. When in timber increase distance to 2.5 times the height of the trees.

8. MEDICAL EMERGENCY PROCEDURES

15m

1 hr.

45m

LINE MEDICAL EMERGENCY:

MEE Memorial Hospital

Crew Supervisor contact Division Supervisor/Operations with patient complaint, condition and location. Division Supervisor/Operations contacts Communication:

Monterey, Ca 93942

300 Canal St

King City, Ca

N 36 12.33 W 121 07.95

- Division Supervisor/Operations to use "injury or incident communication protocol" on next page
- Division Supervisor/Operations will run medical emergency on command channel
- Communications will contact the Medical Unit Leader on Command channel.
- Medical Unit Leader will:
 - 1. Have communications dispatch ground/air transport resources
 - Notify receiving hospital of injury status.
 - Develop primary and contingency transport plan
 - 4. Notify Incident Commander, Safety, Logistics and Operations

CAMP MEDICAL EMERGENCY:

Contact Communications with patient complaint/condition and location, via LOGs Net

- Medical Unit contacts:
 - Safety
 - Logistics
 - Operations
- Medical Unit Leader will:
 - Contact Communications to dispatch ground/air transport resources
 - 2 Notify receiving hospital of injury status
 - 3. Develop primary and contingency transport plan

Air Transportation Triage

	Ground or Air Ambulance to Hosp.	Transport to Med Unit
Mechanism	Hit by a falling tree or large branch	Minor dehydration
	Fall of 10' or more	Cut or laceration with bleeding controlled
	Insect bite with shortness of breath	Minor bites and Stings
	Signs of heat stroke (hot, dry, disoriented)	Minor burns
	Burn Injury greater than 1% body area	
Area Injured	Significant Blunt or Penetrating Trauma to	Minor blunt trauma
	Head, Neck, Chest, Abdomen or pelvis	Minor penetrating trauma
	Any Arm or Leg fracture above the Joint	Extremity sprains and strains
		Simple fracture below elbow or knee
Symptoms	Disoriented	Alert and oriented
Symptoms	Chest Pain <u>or</u> Shortness of Breath	No shortness of breath
	Weak or absent radial pulse	Good pulses
	Pale, cold and sweating	

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.

The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Kx and 1x reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you. ICS 205 Excel

IIBMHB 2016 - PERSONNEL CHAPTER 10

Meal Periods (Actual Hours Worked Employees)

Compensable meal periods <u>are the exception</u>, not the rule (5 CFR 551.411 (c) 36 and 29 CFR 785.19 (a))

Personnel <u>assigned to the fireline</u> may be compensated for their meal period if all of the following conditions are met:

- The fire is not controlled, and
- The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, **and**
- The compensable meal break is approved by the supervisor at the next level and it is documented in remarks on the CTR, SF-261.

In those situations where all other incident <u>support personnel cannot be relieved</u> from performing work and must remain at a post of duty, a meal period may be recorded as time worked for which compensation shall be allowed and <u>documented in remarks block on the CTR, SF-261</u>.

For <u>personnel in support positions</u>, and <u>fireline personnel after control</u> of the fire, a meal period of <u>at least</u> 30 minutes must be ordered and taken for each work shift (e.g., a <u>minimum</u> 30 minute break for shifts of 8 hours or more). All meal periods unless justified in remarks must be shown as a 30 minute break.

Local Government responding under CFAA follow their department policy and guidelines regarding hours and meal breaks.

On-Shift Time

On-shift time includes a combination of actual work, ordered standby, and compensable travel. On-shift time has a specific start and ending time and is recorded as clock hours. Each resource is responsible for ensuring they are meeting their 2/1 Work Rest Ratio and/or getting approval in advance from their supervisor and completing a Work Rest/Mitigation form to be approved by IC.

Human Resource Message

Don't Forget Where You Came From!

As we promote in our careers, we tend to wear many hats. Those "hats" give you more responsibility and authority. However, as you're switching from hat to hat, never forget that you once wore that same hat that someone else is wearing now therefore, don't ever think that you are in too high of a position to help guide, mentor, or train those below you. You never know what may happen in your career path, you may one day have to wear one of those previous worn hats.

Archaeological and Historical Sites Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

- 1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
- 2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.
- 3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
- Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
- 5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph. Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
- 6. If you encounter a burial or human remains, cease work in the area immediately and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.
